

**2022 Annual Report to  
The Canadian Association  
of Music Therapists**

**Music Therapy  
Association  
of Saskatchewan**

The Music Therapy Association of Saskatchewan (MTAS) has continued to be active in acknowledging the expertise of our members and offering opportunities for information sharing and connection over the past year. We have a full board, including an additional Member at Large and hope to continue growing our board. We have carried forward the “Expert Series” continuing education video conferences which was launched in 2020/2021. Our 2021/2022 series was well received and useful for connecting with our membership. In addition to this, members of the board have worked hard to create a quarterly newsletter which contains ideas and resources for clinical work as well as a special “member spotlight” interview. It has been wonderful to learn more about some of our members through these interviews. MTAS continues to be involved with FACT-SK which has been working for several years to achieve the regulation of Counselling Therapy in Saskatchewan. Unfortunately, the most recent application submitted to the SK Ministry of Health was rejected. As a collective, various members of FACT-SK are reaching out to existing regulatory colleges asking for letters of support with the goal of submitting another application in the future. MTAS also strives to increase cultural awareness as we study and discuss the Truth and Reconciliation Health Care Calls to Action and how we can continue to incorporate this knowledge into music therapy practice.

Respectfully submitted,

Amanda Schenstead, MTA, MMT, BMus  
MTAS President
